

Engineering for sustainable development

HidroAtlântico

Engenharia e Gestão

www.hidroatlântico.com

About the company

HidroAtlântico is an engineering consulting company operating since 2007 in two main activities areas: Studies, Engineering Design and Project Management; Real Estate & Facilities Management.

Our main skills are Urban hydraulics and Hydraulic resources, Buildings, Transports, Infrastructures and Environment.

Having started its activity in the Azores, HidroAtlântico now has presence in the continent as well as in Angola, Cape Verde, Brazil and Equatorial Guinea.

MISSION

Contribute to the execution of sustainable real estate projects that promoting sustainability development and environment and quality of life.

VISION

HidroAtlântico must be associated by our Clients to our Entrepreneurial vision of engineering of the future, based on (i) innovative processes, (ii) industry best practices and (iii) optimization of the CAPEX - OPEX balance (investment costs vs operation expenditures).

HidroAtlântico guaranties: (i) quality of provision of services; (ii) bespoke solutions and particularly, (ii) a trust based relationship with the Client.

Design and Technical Studies, Works Supervision and Health and Safety Coordination

- Urban hydraulics
- Marine and river hydraulics
- Dams
- Water treatment stations
- Private and Public buildings

- Industry
- Roads and motorways
- Bridges and structures
- Energy, production and transport
- Environment and waste management

Economical studies:

- Urban services like water, sanitation and public lighting
- Transports
- Waste management

Management, Maintenance and Operation:

- Urban services like water, sanitation and public lighting
- Buildings
- Waste management

Rehabilitation and optimization of
